

MEDICAL POLICY CSM-SPX-062

Cascadia Mutual | Intravenous Iron Replacement Products | Effective 2026-01-01

SCOPE

This policy establishes the medical necessity criteria applied by Cascadia Mutual to requests for intravenous iron replacement products for commercial plan members. It applies to requests submitted directly by a prescriber and to requests submitted by an authorised manufacturer hub agent on the prescriber's behalf.

DRUGS REQUIRING PRIOR AUTHORIZATION

Prior authorization is required for products billed under the following codes: J1439. J1439 corresponds to ferric carbolate, marketed as Ferexa, 750 mg/15 ml single-dose vial.

DRUGS NOT REQUIRING PRIOR AUTHORIZATION

Oral iron preparations and intravenous iron dosed at or below the open access threshold at an in-network site do not require prior authorization under this plan.

MEDICAL NECESSITY CRITERIA

Ferexa is considered medically necessary when all of the following criteria are met:

1. Intravenous iron replacement products listed on the plan's open-access medical benefit schedule do not require prior authorization when the cumulative elemental iron dose requested is 1,500 mg or less within any rolling twelve-month period.
2. Administration must occur at an in-network infusion site of care. Requests for administration in an out-of-network setting require prior authorization regardless of dose.
3. The plan requires a therapy start notification, filed by the prescriber or an authorized hub agent, within five business days of the first administration.

EXCEPTIONS

Requests exceeding the 1,500 mg rolling twelve-month threshold, or requests for administration at a site of care outside the plan network, fall outside open access and are reviewed under the plan's standard specialty drug prior authorization process.

DOCUMENTATION REQUIREMENTS

A therapy start notification must be accompanied by the signed prescriber enrollment or start form and a laboratory report documenting the iron deficiency, dated within ninety days of the request.

REVIEW TIMEFRAMES

Standard requests are adjudicated within five (5) business days of receipt of a complete submission. Expedited requests are adjudicated within seventy-two (72) hours. An incomplete submission is returned with a written statement of the missing element and the review clock restarts on receipt of the complete packet.

CODING

CODE	TYPE	DESCRIPTION
J1439	HCPCS	Ferric Carbolate, per billing unit
58291-0750-02	NDC	Ferexa 750 mg/15 mL single-dose vial
D50.9	ICD-10-CM	Iron deficiency anemia, unspecified
