

MEDICAL POLICY AHP-SPX-204

Anvara Health Plan | Enzyme Replacement Therapy for Gaucher Disease Type 1 | Effective 2026-01-01

SCOPE

This policy establishes the medical necessity criteria applied by Anvara Health Plan to requests for enzyme replacement therapy for gaucher disease type 1 for commercial plan members. It applies to requests submitted directly by a prescriber and to requests submitted by an authorised manufacturer hub agent on the prescriber's behalf.

DRUGS REQUIRING PRIOR AUTHORIZATION

Prior authorization is required for products billed under the following codes: J1786. J1786 corresponds to alglucerase beta, marketed as Zymvora, 400 units per single-dose vial.

DRUGS NOT REQUIRING PRIOR AUTHORIZATION

Substrate reduction therapy dispensed under the pharmacy benefit is reviewed under policy AHP-SPX-206 and is not covered by this policy.

MEDICAL NECESSITY CRITERIA

Zymvora is considered medically necessary when all of the following criteria are met:

1. The patient has an established diagnosis of Gaucher disease type 1 confirmed by deficient acid beta-glucosidase enzyme activity or by biallelic pathogenic GBA1 variants.
2. The patient has been receiving enzyme replacement therapy under a previously approved authorization and the request is for continuation at the same or a reduced dose.
3. Haematologic response is documented within the six (6) months preceding the request, showing haemoglobin and platelet count stable or improved relative to pre-treatment values.
4. Organ volume response is documented by abdominal imaging performed within the six (6) months preceding the request, showing spleen and liver volumes stable or reduced relative to the prior assessment.
5. The requested dose does not exceed 60 units per kilogram administered every two weeks.

EXCEPTIONS

Where imaging within six months is not clinically feasible, the plan will accept a prescriber attestation that the patient remains clinically stable together with a plasma glucosylsphingosine or chitotriosidase result within three months. The attestation must state the reason imaging was deferred.

DOCUMENTATION REQUIREMENTS

Continuation requests must include the signed renewal form, a statement of medical necessity, a clinical note from the treating specialist within six months, laboratory results within six months, and abdominal imaging within six months or a documented attestation under the exception above.

REVIEW TIMEFRAMES

Standard requests are adjudicated within five (5) business days of receipt of a complete submission. Expedited requests are adjudicated within seventy-two (72) hours. An incomplete submission is returned with a written statement of the missing element and the review clock restarts on receipt of the complete packet.

CODING

CODE	TYPE	DESCRIPTION
J1786	HCPCS	Alglucerase Beta, per billing unit
58291-0400-04	NDC	Zymvora 400 units per single-dose vial
E75.22	ICD-10-CM	Gaucher disease
