

MEDICAL POLICY NGB-SPX-091

Northgate Benefit Trust | CGRP Antagonists for Migraine Prophylaxis | Effective 2026-01-01

SCOPE

This policy establishes the medical necessity criteria applied by Northgate Benefit Trust to requests for cgrp antagonists for migraine prophylaxis for commercial plan members. It applies to requests submitted directly by a prescriber and to requests submitted by an authorised manufacturer hub agent on the prescriber's behalf.

DRUGS REQUIRING PRIOR AUTHORIZATION

Prior authorization is required for products billed under the following codes: J3031. J3031 corresponds to obeltamab, marketed as Neuvexa, 140 mg/ml single-dose autoinjector.

DRUGS NOT REQUIRING PRIOR AUTHORIZATION

Acute migraine abortive therapies, including triptans and non-steroidal anti-inflammatory drugs, do not require prior authorization under this plan.

MEDICAL NECESSITY CRITERIA

Neuvexa is considered medically necessary when all of the following criteria are met:

1. The patient has a diagnosis of chronic migraine, defined as fifteen (15) or more headache days per month for at least three months, documented in a headache diary or clinical note.
2. The patient is 18 years of age or older.
3. The patient has completed a trial of at least two (2) migraine preventive agents from separate pharmacologic classes, each sustained for a minimum of eight (8) weeks at a therapeutic dose, without adequate response or with documented intolerance.
4. The drug is prescribed by, or in documented consultation with, a neurologist or headache specialist.
5. The patient is not concurrently receiving another calcitonin gene-related peptide antagonist.

EXCEPTIONS

The two-agent step therapy requirement is reduced to one agent where the patient has a documented contraindication to all remaining classes, is pregnant or planning pregnancy, or has a documented history of an adverse drug reaction requiring hospitalisation. Discontinuation for cost, convenience, or patient preference does not satisfy the step therapy requirement.

DOCUMENTATION REQUIREMENTS

Submitted requests must include the signed prescriber enrollment or start form and a clinical note documenting headache frequency, each preventive agent tried with its dose and duration, and the reason each was discontinued.

REVIEW TIMEFRAMES

Standard requests are adjudicated within five (5) business days of receipt of a complete submission. Expedited requests are adjudicated within seventy-two (72) hours. An incomplete submission is returned with a written statement of the missing element and the review clock restarts on receipt of the complete packet.

CODING

CODE	TYPE	DESCRIPTION
J3031	HCPCS	Obeltamab, per billing unit
58291-0140-01	NDC	Neuvexa 140 mg/mL single-dose autoinjector
G43.709	ICD-10-CM	Chronic migraine without aura, intractable
